

Luxury Fragrance Needs to Become Personal

Problem: “Despite thousands of fragrance options, consumers struggle to find and apply a scent that truly fits their identity.”

- Most perfumes are mass-produced.
- Consumers want scents that reflect **their identity, lifestyle, and mood.**

Insight

- Fragrance is a form of **self-expression** and **confidence**.
- But consumers often **don't know how to wear fragrance properly** (amount, placement, weather impact).

Opportunity

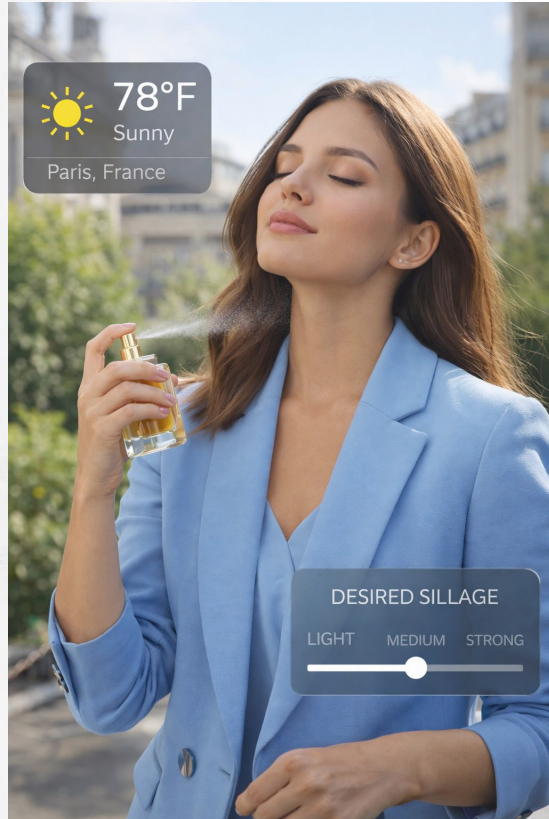

Create a fragrance experience that adapts to **the individual, their style, and their environment.**

Alignment with L'Oréal

- **Beauty Tech Leadership:** Scaled AI integration fulfills the "Beauty for Each" mission, replacing traditional choice paralysis with a high-value, bespoke service model.
- **Circular Innovation:** A refillable hardware strategy directly advances 2030 sustainability goals by eliminating packaging waste and securing long-term consumer loyalty.

The Brand

MON SILLAGE — AI-powered personalized fragrance guidance

Savoir-Faire

- A bespoke fragrance experience, like tailored fashion.
- Your scent is crafted to match your personality and outfit, with **one free modification within the first month.**
- **The Invisible Brand:** By intentionally omitting a brand logo from the vessel, we honor the ultimate luxury: privacy. The bottle remains a "blank canvas," ensuring that the consumer—not the house—is the brand.

Sustainability

- One signature scent for each season,
- **Refilled in the same bottle** to reduce waste and encourage mindful consumption.
- Aluminum outer shell and PCR glass (reduce up to 30% CO2 yet remains a luxury touch)

Tech & Science

- An AI-powered tool analyzes **your outfit, local weather, and desired sillage.**
- It then recommends **where to spray and how much fragrance to apply** for the perfect scent experience.

User Map

Rationale: The Intuitive Discovery Path

The journey begins with **low-friction, environmental data** (Location/Climate) to build technical trust. This anchors the experience in "Tech & Science" before transitioning the user into the **intimate, bespoke discovery** of Personality and Sillage, turning data entry into a premium consultation.

For your desired sillage of seven, generously apply four sprays: one to each wrist, one to your décolletage beneath your sweatshirt, and a final mist onto the fabric of your collar. This strategic layering on skin and dense cotton will maximize projection in the 35°F chill, ensuring a lasting presence.
